All Services Under One Roof

Unlike some companies, Rapid Building Solutions provides all the necessary services under one roof. Our erection experts will reduce unnecessary expenses and avoid unforeseen delays that typically occur when dealing with several consultants at once.

Rapid Building Solutions offers a full-range of services to providing unmatched quality and full line of customized storage options. Some of these additional options include airplane hangars, office/flex space and rigid frame buildings with a variety of spanning options.

Single Story Buildings

At Rapid Building Solutions we pride ourselves on offering industry-leading solutions for single-story building needs.

As a developer or owner you need flexibility in design and sound advice in construction. Besides offering high quality materials, Rapid Building Solutions can provide you with years of knowledge and expertise. When we combine our innovation single-story building systems with a staff of self storage professionals and structural engineers, our clients are assured an efficient plan, fast delivery and timely construction.

Single-Story Building Solutions That Last

- Flexible and secure Construction
- Quality and Value
- Broad Range of sizes
- Simplified Construction
- Structural Piers and Header systems

Multi Story Buildings

Our Multi-Story Storage Building Solutions

With soaring property cost and fewer urban land options, multi-story has become the trend in today's rapidly growing storage industry.

Our Multi Storage Building Experts

Rapid Building Solutions designs its multi-story facilities with efficiency and value in mind. When our clients look to us for advise on strict zoning requirements or exceptionally tight land use availability, we offer years of sound solutions. Each multi-story design can be integrated into even the most restrictive building sites. When it comes to multi-story systems, look to Rapid Building Solutions for innovation and expertise.

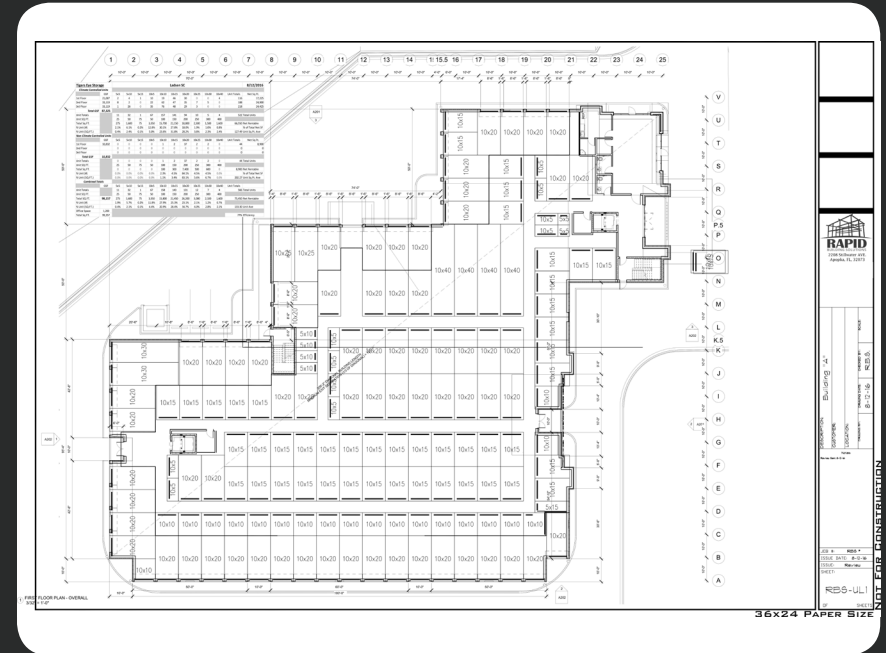

- A cost effective 5 x 10 grid system
- Choice of perimeter appearances from basic steel construction to commercial office type facades including insulated wall panels with a wide variety of finishes.
- Split level design allowing ground access to each floor. Ideal for steep site conditions.
- Multi-story buildings increase road visibility of the project increasing and enhancing prospective tenant awareness.
